

LINGUISTICS (HBA)

Department of Language Studies

Linguistics is the scientific study of language. At the heart of linguistics is understanding language in the mind: What is the nature of the unconscious knowledge that humans have of language? How do we process this knowledge? How do children acquire language? How do languages vary? What properties are common to all human languages? How does language influence the way we interact with each other? Linguistics Major is a program that will give you insight into one of the most defining features of being human: the ability to communicate through language. Our program provides a strong foundation in the core aspects of human language: sounds (phonetics and phonology), words (morphology), sentences (syntax), and meaning (semantics). The world-class expertise of our faculty also allow students to apply their foundational knowledge via courses and research opportunities to areas such as how language varies depending on group, situation, or region (sociolinguistics), how language varies over time (historical linguistics), how people use language in context (pragmatics and discourse analysis), how people acquire or learn language, and how it is taught. Students can also investigate how to model aspects of language (theoretical and computational linguistics) and how people process language (psycholinguistics).

MAKE THE MOST OF YOUR TIME AT UTM!

We want to help you maximize your university experience, so we've pulled together information and interesting suggestions to get you started, although there are many more! As you review the chart on the inside pages, note that many of the suggestions need not be restricted to the year they are mentioned. In fact, activities such as joining an academic society, engaging with faculty and seeking opportunities to gain experience should occur in each year of your study at UTM. Read through the chart and create your own plan using [My Program Plan](http://www.utm.utoronto.ca/program-plans) found at www.utm.utoronto.ca/program-plans

LINGUISTICS

Skills developed in Linguistics

To be competitive in the job market, it is essential that you can explain your skills to an employer. Visit the Career Centre to learn how to articulate and market the following skills:

Technical: knowledge of the various abstract structural subsystems of human language; knowledge of how humans produce and process language; knowledge of how babies acquire their language(s); how language(s) are learned as an adult; how it varies and changes through space and time.

Research: Experience with hands-on experimental methods; collecting data; quantifying data; analysing data; application of data to theoretical models; engaging in the development of linguistic theory.

Analytical: Analytic reasoning; critical thinking; methods of argumentation; formulating hypotheses; generating predictions; making careful observations.

Communication and interpersonal: Proficiency in oral and written expression; communicating complex information to a variety of audiences; awareness of how language is modulated according to social contexts; awareness of and respect for linguistic and cultural diversity.

FUTURE STUDENTS

Admission to UTM

All program areas require an Ontario Secondary School Diploma, or equivalent, with six Grade 12 U/M courses, or equivalent, including English. The admission average is calculated with English plus the next best five courses. The approximate average required for admission is mid- to high-70s. More information is available at utm.utoronto.ca/viewbook.

NOTE: During the application process, applicants will select the Humanities admissions category, but will not officially be admitted to a formal program of study (Specialist, Major, and/or Minor) until after first year.

Sneak Peek

How are words formed? What is their internal structure? This is the domain of morphology, and you can learn about it in LIN231H5. Have you ever noticed how the sentences you create are formed according to strict rules? Learn about this rule system in LIN232H5 Syntactic Patterns! How do we derive meaning from the units of language? How do units of meaning combine to make larger meanings? How do we account for meaning we can't hear? These mysteries are revealed in LIN237H5 Semantics.

Are you curious about how language can vary and change according to our age, gender, ethnicity, and the social dynamics of different situations? Check out how in LIN256H5 Sociolinguistics. What about the mystery of how babies acquire language or how the human mind processes language input? You'll be introduced to this field of inquiry in LIN288H5 Psycholinguistics and Language Acquisition.
