Physiology is the study of living matter and its interaction between internal and external environments. It integrates physical and life sciences in order to understand body functions and the origins of disease in both plants and animals. This discipline incorporates the study of control mechanisms, compensations, and cooperation among body molecules, cells, tissues, and organs. Physiology unifies the life sciences from molecule to organism, providing the link from genomics and molecular signaling pathways to behaviour and disease. Emerging fields for physiologists are the analysis of the functional implications of genomic sequence variation, developmental factors leading to chronic illness, and novel approaches for regenerative medicine. Physiologists find applications for their work in agriculture, veterinary medicine, military research, air and space travel, and exercise and fitness.

Programs of Study (POST)
- Specialist Program ERSPE0482 Comparative Physiology (Science)
- Minor Program ERMIN2364 Biology (Science)

Check out...
How do plants respond to environmental factors and global change? Find out in BIO312H5 through the physiological study of plants. Get excited about vertebrate form and function! In BIO354H5 the design and adaptive consequences of vertebrate structure are revealed.

What can I do with my degree?
The career you choose will depend on your experience and interests. Visit the Career Centre to explore your career options.

Careers for Graduates: Physiotherapist; Ornithologist; Informationist; Biological technician; Zoologist; Doctor; Physician’s assistant; Nurse; Research technician; Health policy analyst; Herbarium technician.

Workplaces: Government; Zoos; Aquariums; Pharmaceuticals; Academic medical centres/laboratories; Manufacturing; Hospitals and medical centres.
**COMPARATIVE PHYSIOLOGY**

**SPECIALIST Program Plan**

---

### 1ST YEAR

- **Enrol in courses**: BIO150H5, 151H5, CHM110H5, 120H5, and MAM139H5, 135Y5, 137Y5. Attain 1.0 credit from the second list of required first year courses in the Academic Calendar.
- **Choose a program of study**: Subject POSt once you complete 4.0 credits. Use the Degree Explorer Planner and the Academic Calendar to plan your degree.
- **Start strong and get informed**: through the Centre for Student Engagement (CSE). Join a RGASC Peer Facilitated Study Group.

#### PLAN YOUR ACADEMICS*

<table>
<thead>
<tr>
<th>1ST YEAR</th>
<th>2ND YEAR</th>
<th>3RD YEAR</th>
<th>4TH OR FINAL YEAR</th>

#### BUILD SKILLS FOR YOUR PLAN

- **Networking simply means talking to people...** through the Centre for Student Engagement (CSE). Join a RGASC Peer Facilitated Study Group.
- **Use the Co-Curricular Record (CCR)**. Search for opportunities beyond the class room, and keep track of your accomplishments.
- **Attend the Get Experience Fair** through the Career Centre (CC) to learn about on- and off-campus opportunities.
- **Networking simply means talking to people...** through the Centre for Student Engagement (CSE). Join a RGASC Peer Facilitated Study Group.
- **Use the Career Learning Network (CLN)**. Search for on- and off-campus work and volunteer opportunities as well as Work-Study.
- **Networking simply means talking to people...** through the Centre for Student Engagement (CSE). Join a RGASC Peer Facilitated Study Group.

#### BUILD A NETWORK

- **Visit the UTM Library Reference Desk**.
- **Attend events held by the International Education Centre (IEC)**, whether you are an international or domestic student. Explore different cultures through food, music, and sport or through sight-seeing around the GTA.
- **Start with the International Education Week events and learn about the diversity, culture, and international opportunities on campus!**
- **Visit the UTM Library Reference Desk**.

#### PLAN FOR YOUR FUTURE

**HOW TO USE THIS PROGRAM PLAN**

Read through each year. Investigate what appears to you here and in any other Program Plans that apply to you.

Visit www.utm.utoronto.ca/program-plans to create your own plan using My Program Plan. Update your plan yearly.

---

*Consult the Academic Calendar for greater detail on course requirements, program notes and degree requirements.

Revised on: 6/7/2018

Visit www.utm.utoronto.ca/program-plans for the online version and links.
Skills developed in Comparative Physiology

To be competitive in the job market, it is essential that you can explain your skills to an employer. Visit the Career Centre to learn how to articulate and market the following skills:

**Communication & interpersonal:** write scientific reports; present research findings; interact professionally with a multidisciplinary team of researchers, technicians, students and professors; and literacy writing.

**Research:** collect and preserve field organisms; dissect preserved or euthanized specimen; inspect specimens; and analyze and evaluate information.

**Technical:** use specialized computer programs; perform laboratory procedures; maintain laboratory equipment and instrumentation; and comply with quality control procedures.

**Quantitative:** analyze data for trends and apply statistical tests to data.

**Critical thinking & problem-solving:** logically interpret trends and results.

Services that support you

- Accessibility Services (AS)
- Career Centre (CC)
- Centre for Student Engagement (CSE)
- Experiential Education Unit (EEU)
- Health & Counselling Centre (HCC)
- Indigenous Centre (IC)
- International Education Centre (IEC)
- Office of the Registrar (OR)
- Recreation, Athletics and Wellness Centre (RAWC)
- Robert Gillespie Academic Skills Centre (RGASC)
- UTM Library, Hazel McCallion Academic Learning Centre (HMALC)

---

Get involved

Check out the 100+ student organizations on campus. Here are a few:

- Erindale Biology Society (EBS)
- UTM Student Union (UTMSU)
- UTM Athletics Council (UTMAC)

For a listing of clubs on campus visit www.utm.utoronto.ca/clubs.

FUTURE STUDENTS

Admission to UTM

All program areas require an Ontario Secondary School Diploma, or equivalent, with six Grade 12 U/M courses, or equivalent, including English. The admission average is calculated with English plus the next best five courses. The Grade 12 prerequisites for this program are Advanced Functions, Biology and Chemistry. The approximate average required for admission is low- to mid-80s. More information is available at utm.utoronto.ca/viewbook.

**NOTE:** During the application process, applicants will select the Life Sciences admissions category, but will not officially be admitted to a formal program of study (Specialist, Major, and/or Minor) until after first year.

---

Sneak Peek

Curious about animal physiology? Discover the diversity of structure and function in animals in BIO202H5. At UTM, Physiology explores a variety of topics, such as endocrinology, cardiovascular physiology, neurophysiology, and sensory physiology.

Effective biological training involves careful study of real organisms, both living and dead. Almost all Biology courses with laboratories involve students in one or more of the following activities with animals, plants, and/or microorganisms: collecting and preserving organisms from the field; dissecting or handling preserved or euthanized specimens (or properly anaesthetized living specimens); observing and making measurements on organisms maintained under laboratory conditions approved by the Canadian Council of Animal Care.
