What is knowledge? What is justice? When is war justified? What sort of thing am I - a (merely) physical entity, or something more? What makes me, me? Where is the line between art and propaganda? In philosophy, we ask and try to answer some of the deepest questions confronting us as human beings. Our philosophical reflections are guided by critical engagements with the views of great thinkers like Plato, Aristotle, Descartes, Nietzsche, and many others. Philosophy teaches you to read critically and write in a succinct and compelling way - perhaps the most important communicative skills you will ever develop. It also asks you to express, and shows you how to defend, your own views. This type of “dialectical” activity will enable you to discover what you think and value, and to express your views persuasively. These skills are vital to success in almost any career path one could follow, from law and journalism to marketing and business administration.
