Sociology is the systematic study of the social world. Sociologists focus on: health and disability; global inequality; social class; sexuality and gender; race and ethnicity; culture; education; crime and deviance; immigration; and power and politics.

Our teaching and research expertise covers diverse topics central to understanding and explaining the state of society and social change. Students develop critical thinking, writing, and numeracy skills and learn how to analyze, understand and address real life issues all in preparation for further education and employment.

Investigate the role of education and how it sorts students by race, class and gender in SOC224H5. Examine how characteristics such as gender, age, ethnicity and race manifest in social, political and economic inequalities in SOC263H5.

Our department spearheads the Peel Social Lab (PSL): a lab dedicated to gathering, storing, analyzing and sharing data on the UTM and broader Peel region, which fosters experiential learning opportunities for students. By incorporating data-gathering efforts into undergraduate sociology classes, the PSL gives students hands-on experience in research design and analysis conducted on Peel region society. Such work provides students with valuable research skills, while also helping students establish contacts within the wider Peel region.
