

SkyPower Sustainability Intern

Andrea Mendiwelo Moreno

About SkyPower

WE SUPPORT
Caring for Climate

GLOBAL PRESENCE
With 36 offices across the globe, SkyPower develops, finances, owns and operates solar energy projects, from the initial stages through commercial operation, in nearly every region of the world.

SOLAR ELECTRICITY
Ground-breaking solar initiatives build stronger economies and a cleaner environment by adding renewables to the energy mix.

ENERGY SALES
SkyPower has secured power purchase agreements and contracts representing over US \$80 billion of long-term renewable energy sales to leading utilities and governments globally.

Key Takeaways

What you put out is what you get back

Paying attention to detail and aiming for perfection is tempting but not realistic with very tight deadlines

Under promise and over deliver

Strong network with very influential people in the industry

Be proactive and curious

Communication Skills

Creative problem solving

Contributions

Worked on RFPs and PPAs for different projects worldwide

Assisted the accounting department with tax information for the many Special Purpose Vehicles (SPE)

Worked with the Corporate Social Responsibility department to create the company's first annual CSR report

Translated various legal documents from Spanish to English

Worked on a specific Colombia initiative to strategize a program for non interconnected zones as well as a larger effort of development on the national grid of Colombia

Reorganized the data rooms

Did you know?

The sun provides as much energy in 88 minutes as humans consume globally in one year.

In 14.5 seconds, the sun provides as much energy to earth as humanity uses in one day.

In 112 hours, the sun provides 36 zettajoules of energy—as much energy as is contained in all proven reserves of oil, coal and natural gas on this planet.
