### About The City of Calgary

Environmental & Safety Management is passionate about protecting the environment and creating a safe and healthy workplace. We strive to protect our city's environment by supporting Calgarians to reduce their impact and ensuring our City lands are safe.

### Highlights

### Key Takeaways

Municipal employees are very open to trying new strategies and working towards a sustainable city.

Communication between Business Units within the City is very important, but is hard to facilitate.

Most people love their jobs, and working for the municipal government.

Plans and strategies must pass through many levels before approval.
