PRODUCTS**

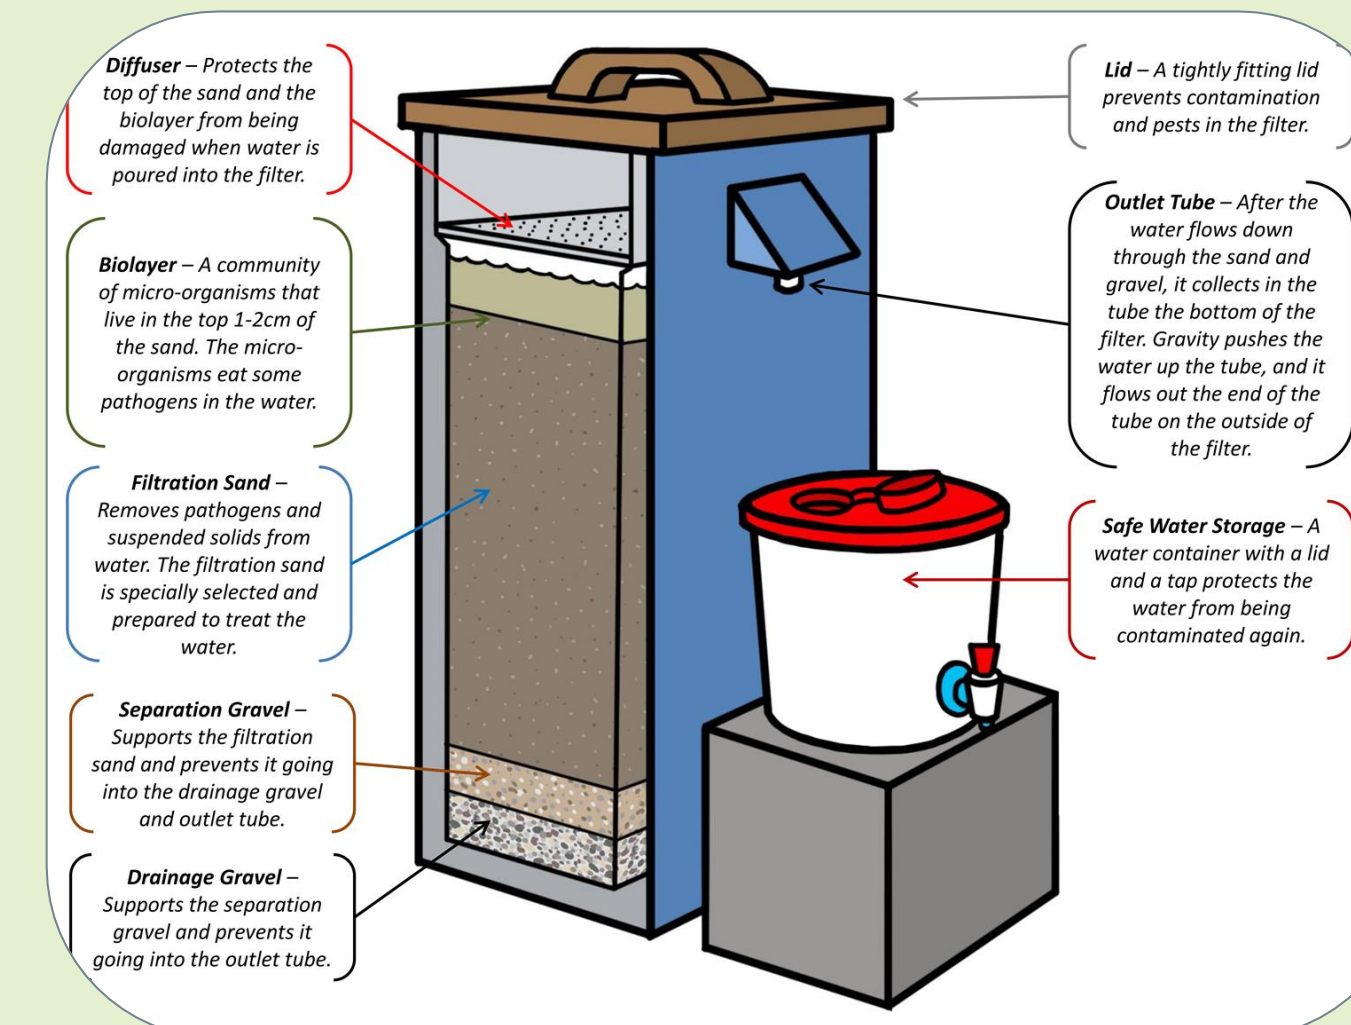

Ideas brought to light

SAFE WATER

- The Safe Water Project trains locals to build, sell and maintain bio-sand filters in their communities

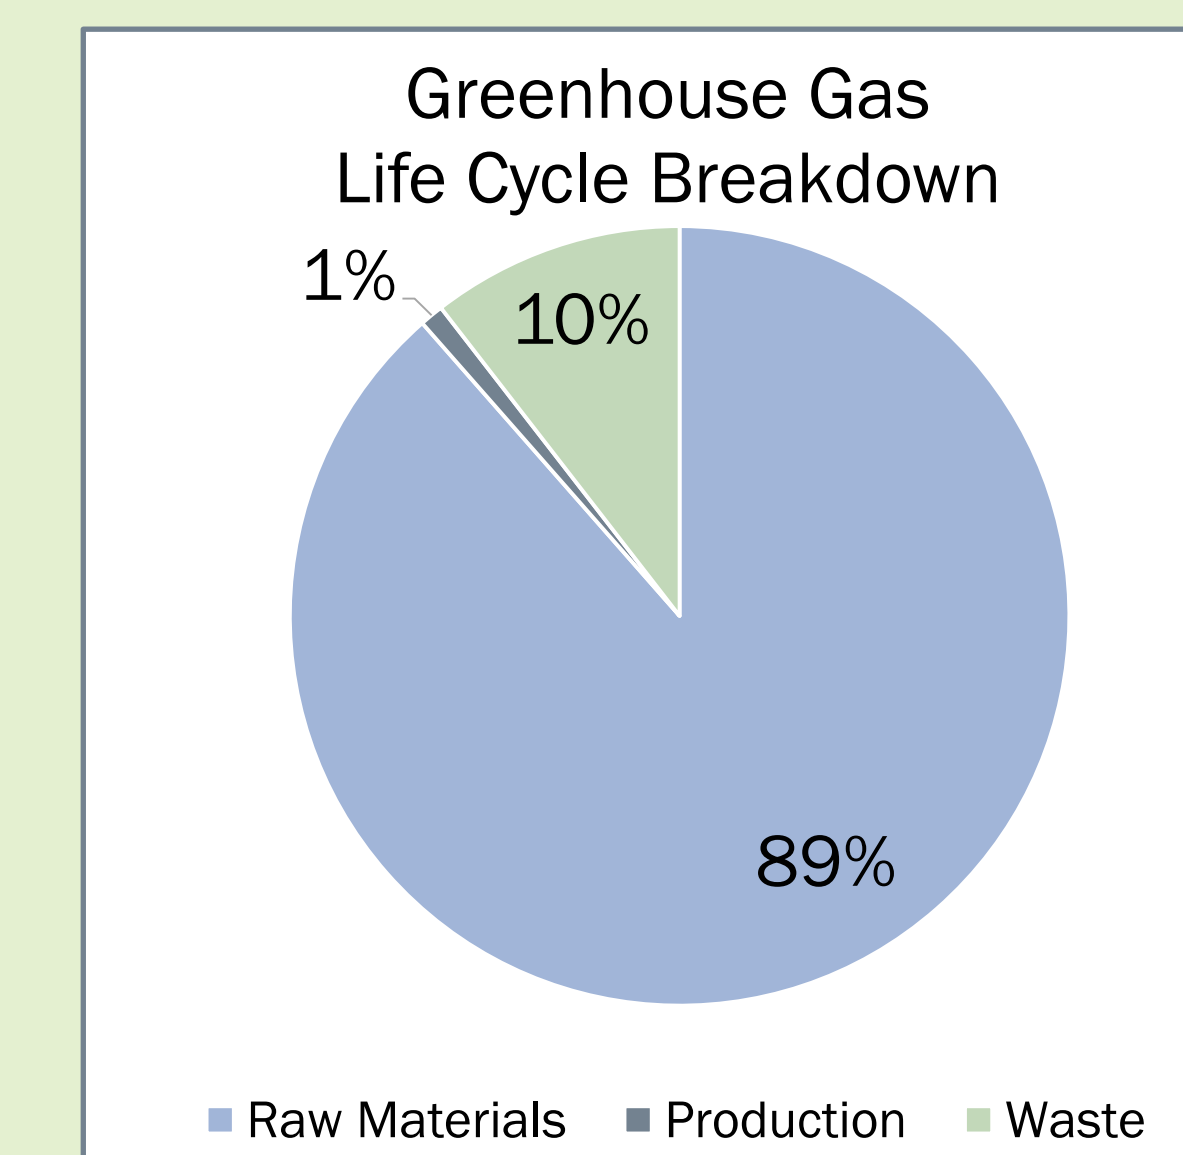

- Developed a resource guide to remotely train entrepreneurs to start their own projects in their communities

FOOD WASTE

- Food waste toolkit for manufacturers to perform their own preliminary food waste audits
- Included life cycle greenhouse gas emissions associated with food waste

Sustainable Development Goals Award 2017 recipient

Next Steps

- Incorporate greenhouse gas into toolkit and develop case studies
- Convert Safe Water Project resource into online modules
- Present material from resource guide at ABINET (African Biosand Filter Implementers Network) Conference
