

THE DELPHI GROUP

Omar Soliman | Research Analyst Intern

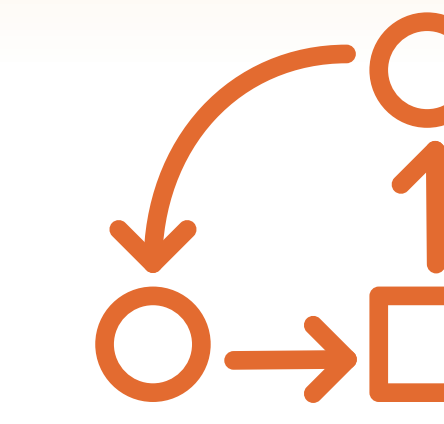

KEY TAKEAWAYS

- In working with Financial information within annual reports, an emerging framework I've come across, called the Task force on Climate related financial disclosures (TCFD) aims to develop voluntary, consistent climate-related financial risk disclosures for use by companies in providing information to investors, lenders, insurers, and other stakeholders.
- Publicly disclosed corporate social responsibility (CSR) reports and the Carbon Disclosure Project (CDP), which systematically aim to measure, disclose, manage and share environmental data are some of the leading open source information hubs on sustainability related metrics.
- > The aim of this is to help companies understand what financial markets want from disclosure in order to measure and respond to climate change risks and encourage firms to align their disclosures with investors' needs.

ABOUT THE DELPHI GROUP

The Delphi Group is a Canadian strategic consultancy providing innovative solutions in the areas of **climate change** and **corporate sustainability**.

SERVICE AREAS INCLUDE:

Strategy

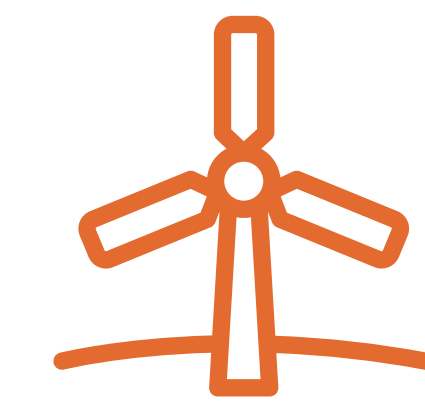

Business Intelligence

Reporting and Analysis

Green Economy
