

ABOUT EAG

Environmental Advisory Group (EAG) is a consulting firm that specializes in the pharmaceutical, hospital and health care industry. For 30 years, EAG has provided services for corporations in:

Packaging & Waste Audits

Research

Return on investment

Regulatory Obligations

INDUSTRY CHALLENGES

- Managing the release of active pharmaceuticals in the environment
- Transparency from suppliers in Tier 1 and Tier 2 is complex.
- COVID-19 pandemic disrupts manufacturers and specialist facilities. Thus, a balancing need between corporate responsibility, environment and human rights cannot be sacrificed as businesses must continue operating

KEY TAKEAWAYS

- “Greening” healthcare is an emerging multi-disciplinary method in promoting climate resilience and enhancing patient care.
- The Pharmaceutical Supply Chain Initiative (PSCI) acts as a supply chain delivery partner and targets both environmental stewardship and SDGs.

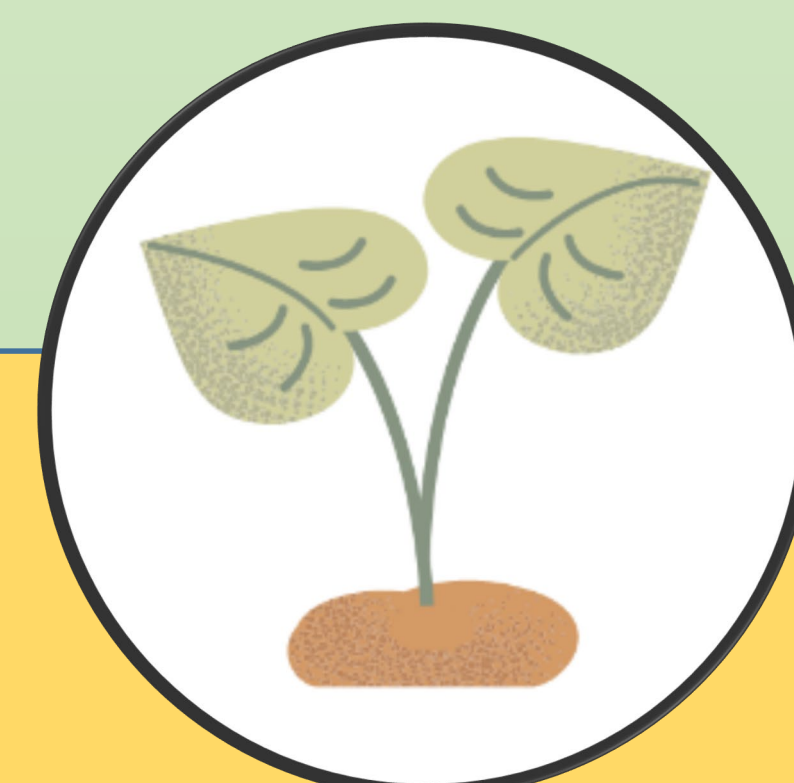

- Pharma companies and hospitals partnered with the Ellen MacArthur Foundation and Circular Economy
- Greater understanding of legislative frameworks, Waste Diversion Act, EPR, End-of-life-Management, and Stewardship Ontario

CONTRIBUTIONS

Packaging Audits:

Organized product codes and calculated corresponding materials to determine the overall weight of the package. This data was submitted to the Canadian Stewardship Services Alliance (CSSA) to fulfill each client’s environmental compliance and regulations. My analytical skills and attention to detail was imperative when detecting discrepancies between 2017-2020 data.

“Dig Your Roots” Grant Proposal for Youth Impact Competition:

The purpose of this project was to transform under-utilized properties of health care industries into green spaces. I effectively communicated the link between the environment and human health by “selling” the idea of:

- Diverse ecosystems created by planting native species and attracting pollinators.
- Employee engagement as a space for leisure, meditation, and sustainable gardening.

Environmental Leadership Awards for Personal Care, Pharmaceuticals and Healthcare Products (ELPH):

Researched potential candidates for 6 various ELPH awards. Contacts and eligibility criteria were found by examining CSR reports, sustainability reports and frameworks such as GRI, SASB and TCFD. By benchmarking each corporation, I learned which companies were leading with their ESG strategies, green procurement, and eco-philanthropy.
