

# Nicole Chafe

Research Assistant, SHARE  
Nicole.chafe@mail.utoronto.ca

## About SHARE

SHARE is a non-profit that works with institutional investors to implement responsible investment strategies in support of creating a sustainable economy. This is achieved through shareholder engagement, proxy voting analysis, policy advocacy, and education/research. SHARE offers responsible investment services to foundations, pension funds, religious investors, universities, and asset managers. Through shareholder engagement, SHARE is able to help improve corporate ESG policies and investment portfolios.

## Role and Responsibilities

### Tasks

- Researching new opportunities for engagement, focusing on biodiversity, toxic materials, and plastics
- Determining best practices for biodiversity engagement
- Researching just transition best practices that are applicable to the Canadian oil and gas sector
- Investigating companies in the Canadian oil and gas sector to determine the level of disclosure of climate lobbying practices

### Challenges

- Limited information available on plastics and toxic materials
- Best practices for a just transition in Canada are not specific to oil and gas
- Oil and gas companies in Canada do not properly disclose climate lobbying practices

## Key Takeaways & Skills Gained

- Lobbying practices are a good indication of a company's climate change priorities
- Biodiversity is a complex subject and engagement will be industry-specific
- A just transition is only possible with collective effort and investment from the oil and gas sector, and government support

## Unique Experiences

Attended the 2021 Responsible Investment Association (RiA) annual virtual conference

Sat in on the Committee on Worker's Capital mid-year virtual round table
