

Blending Sustainable IT, Net-Zero Goals, and Everyday Businesses

Allan Huang – Sustainability Coordinator

1. About Carbon Neutral Technology & Compugen Finance

- Compugen Finance is a sister company of Compugen, a leading Canadian technology company
- Carbon Neutral Technology, also known as CO2Neutral, shares facilities with Compugen Finance but operates independently
- Carbon Neutral Technology has several programs aimed towards promoting the circular economy while ensuring e-waste recycling

2. Daily Tasks

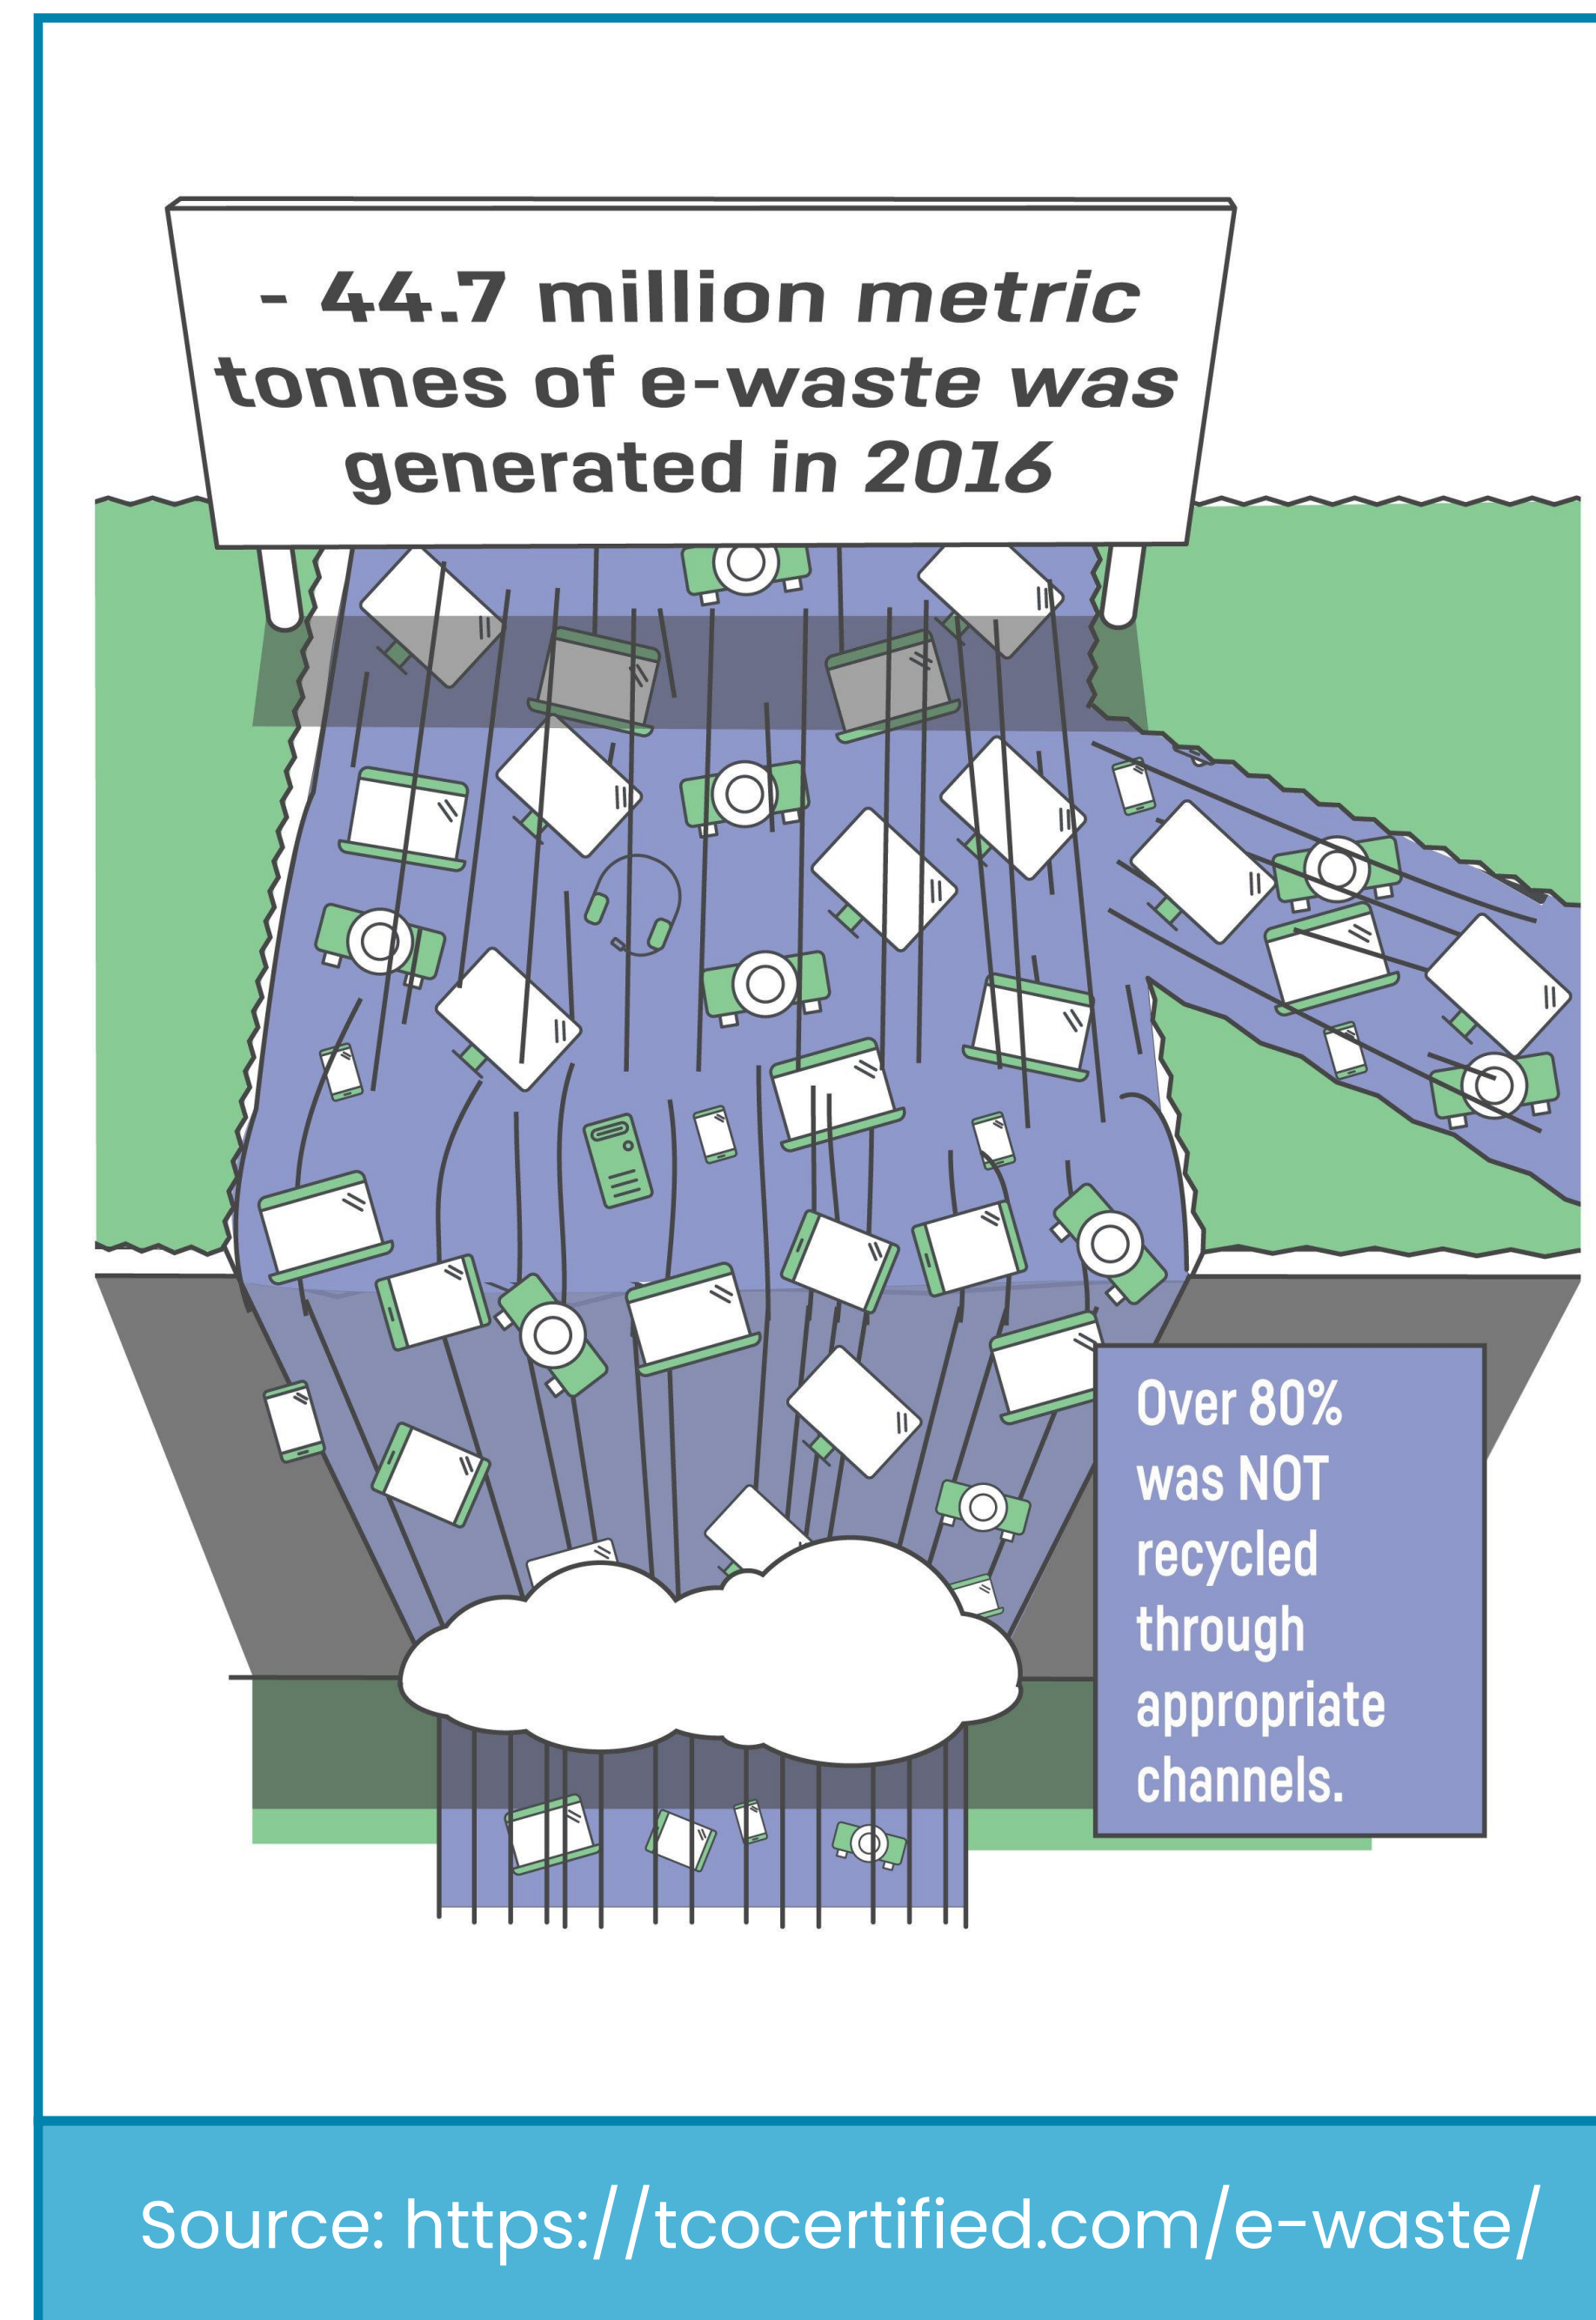

- Prepare sustainability platform reviews for client meetings – review their sustainability work, create a slide of highlights, prepare notes
- Help support the sales team on proper documentation of transactions
- Reach out to potential partners to cooperate in developing innovative sustainable IT programs

3. Sustainability in IT

- E-waste is the most rapidly growing stream of waste as deemed by the UN – about 50 million tons are generated each year and growing
- Manufacturing of IT is carbon intensive and recycling is not always available
- Many companies are looking to leverage digital technologies and IT to meet Net Zero and decarbonization commitments

4. Key Takeaways

- Proper e-waste programs are needed to tackle the massive material waste and health impacts of discarded electronics
- Creating such a system requires collaboration and agreement between several parties in the value chain
