

About Husky

Husky technologies™ is a global technology company that serves the packaging and medical industry.

SUSTAINABILITY AT HUSKY

Husky collaborates with its customers in 140 countries to enable a circular economy using 100% post-consumer recycled PET food and beverage packaging.

The company also focuses on improving internal sustainability standards, offers systematic energy-saving solutions and extends system life.

Key projects

ESG Report: Contributed to the creation of Husky's ESG report, aligning with global standards.

SBTi Targets: Calculated Science-based targets (SBTi) for emissions reduction.

SMETA Audit: Managing Luxembourg and India teams for SMETA audits.

Internal Incentives program: Audit of program that motivates employees to adopt sustainable practices.

Learning Outcomes

Importance of **data-driven decision-making** in setting realistic and impactful emissions reduction goals.

Collaboration and effective communication in achieving compliance across diverse cultural contexts.

Necessity of **continuous assessment and adaptation** in the pursuit of improved sustainability outcomes.

Keen **attention to detail** throughout these projects was essential for ensuring accuracy and credibility in reporting and compliance efforts.
